FLOW SIGHTS

F250 SERIES

Inline double window flow sights can be used to determine flow, clarity of fluid and impurities in either horizontal or vertical pipe runs. Nylon ball flow indicator gives positive flow indication with dark or opaque fluids.

Standard Materials:

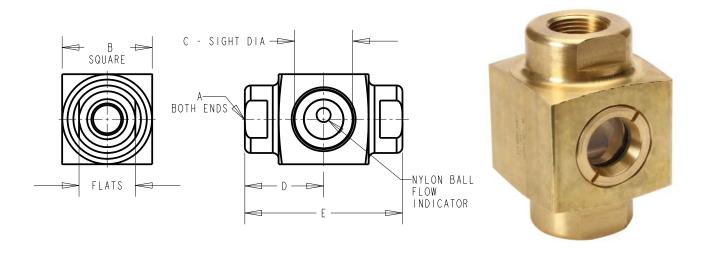

- Brass body
- Tempered borosilicate sight window
- Buna N seals

Temperature Ratings:

- Maximum working temperature up to 180°F (82°C)
- For applications requiring maximum working temperature over 180°F (82°C), please consult factory

Caution:

Scratched glass significantly reduces pressure rating.
