

OIL GAGE- ELBOW WITH REMOVABLE 1.38 (35.05mm) & 2.00 (50.80mm) THERMOMETER

LDI INDUSTRIES' stocks a complete line of vented and pressure type oil gages. Gages are designed so they can be disassembled on site, the elbow alone installed, and the gage reassembled - A big plus when the installation is in a confined area. Protective gage shields can be rotated a full 360° for optimum viewing. The sight opening design allows for the lowest oil level reading possible. For positive sealing, the exclusive LDI Industries' pressure chamber construction employs two trepanned pressure bosses, one in the shank cavity and the other in the closure cap. This unique feature prevents lateral extrusion of the seals under compression and insures against leakers. The well protecting the sensing probe and thermometer can be removed from gage without loss of fluid. The thermometer case is deeply recessed in a heavy bar stock enclosure for maximum protection. GTW100 Series has a 1.38 (35.05mm) diameter dual scale Fahrenheit (50° to 300°) centigrade (10° to 150°) stainless steel thermometer. GTW150 Series has a 2.00 (50.80mm) diameter dual scale Fahrenheit (0° to 300°) centigrade (-20° to 150°) stainless steel thermometer.

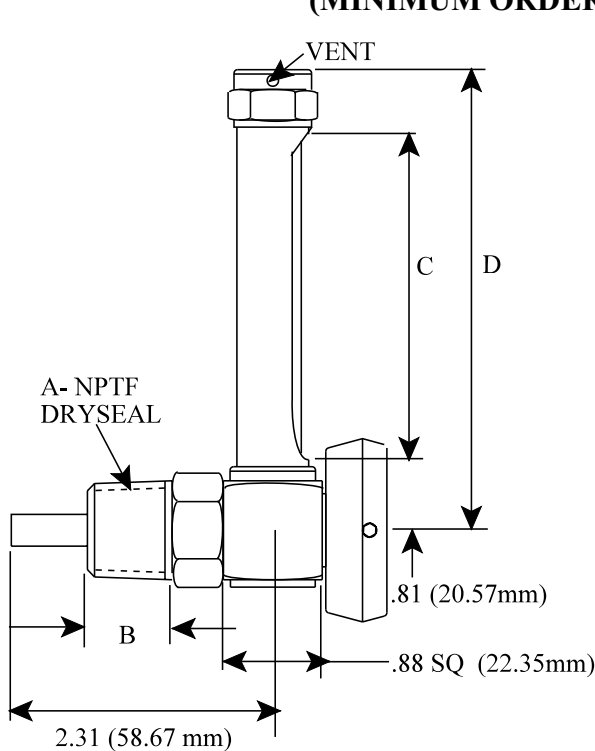

STANDARD MATERIALS:

- Brass construction
- Soda lime glass
- Buna N seals

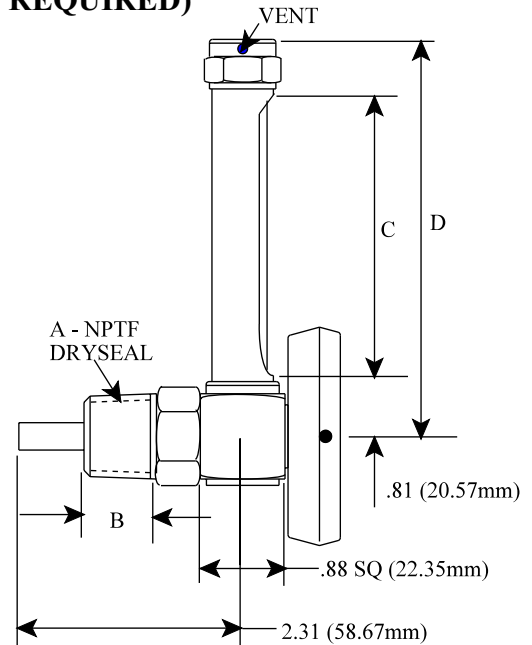

OPERATING CONDITIONS:

- Maximum working temperature with standard seals up to 250°F (121.1°C)

MODIFICATIONS AVAILABLE MADE TO ORDER - CONSULT OUR FACTORY (MINIMUM ORDER MAY BE REQUIRED)
